OFFRES D'EMPLOI

Development Engineer – Measurement Technology (m/f/d)

INNOVATIVE SENSOR TECHNOLOGY IST AG

STAND C08

TYPE DE L'OFFRE : CDI

OFFRE PROPOSEE PAR : R&D

ZONE GEOGRAPHIQUE : 9642
Ebnat-Kappel, Switzerland

PRESENTATION DE L'OFFRE :

The globally active iST Group is a leading provider of physical, chemical, and biological sensor technology. For 35 years, sensors for temperature, flow, gases, conductivity, and other applications have been developed and manufactured at the company's headquarters in Ebnat-Kappel (SG).

To support further development in the field of conductivity sensor technology, we are offering a six-month internship.

The aim of the internship is to develop an understanding of the theoretical fundamentals of conductivity sensing and, in particular, to investigate how the sensor's installation conditions affect measurement results. The experimental measurement results will also be complemented by simulations.
